

Identifying Indicators and Measures of Success in Two-Generation Approaches

September 20, 2016

8:45 a.m.—9:45 a.m.

Speakers:

Dr. Todd Bartko, Senior Research Associate, James Bell Associates

Kim Keating, Senior Research Associate, James Bell Associates

Dr. Anne Mosle, Vice President and Executive Director, Ascend at the Aspen Institute

Moderator:

Denise Litz, Branch Chief, Division of Tribal TANF Management, Office of Family Assistance,
Administration for Children and Families

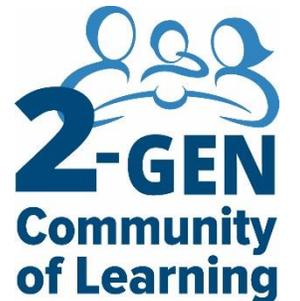

ADMINISTRATION FOR
CHILDREN & FAMILIES

Welcome and Introductions

- Denise Litz, Branch Chief, Division of Tribal TANF Management, Office of Family Assistance, Administration for Children and Families

Implementation, Cost, and Outcome Evaluation of a Two-Generation Strategy

Prepared for the Office of Family Assistance meeting
Community of Learning on Two-Generation Strategies

September 19-20, 2016
Washington DC

W. Todd Bartko, Ph.D.
James Bell Associates, Inc.

Annie E. Casey Foundation Early Childhood Demonstration Grants

“If we simultaneously combine targeted family economic supports, parental skill building, and high quality early education for children, then we will achieve significantly better outcomes for both parents/caregivers and children, compared to the outcomes that can be achieved by siloed single-generation programs.”

Two-Generation Sites

- **The Atlanta Partnership:** Collaboration between Sheltering Arms-Educare and The Center for Working Families, Atlanta, Georgia
- **The Educational Alliance-** New York, New York
- **Garrett County Community Action Committee-** Garrett County, Maryland

Implementation Study

Research Areas

- Two-generation approach (definition, components, evolution)
- Target population characteristics
- Recruitment and retention
- Program participation
- Leadership and staffing
- Partnerships
- Data and MIS
- Costs and revenue

Data Collection

- Site Visits
 - Interviews with multiple levels of staff
 - Focus groups with parents and family service staff
 - Observations of Head Start classes, financial literacy classes, and parenting activities
 - Collection of site documentation
- Update Telephone Calls
- EHS/HS Program Information Report Data
- Management Information System data

Site Contexts

The Atlanta Partnership	Educational Alliance	Garrett County
<ul style="list-style-type: none">• Two primary agencies: FES agency and ECE agency• Urban• 100% African American	<ul style="list-style-type: none">• One agency: Primary partnership with local community college• Urban• 1st Generation Chinese Immigrants, African American and Hispanic	<ul style="list-style-type: none">• One agency: Single Stop CAP agency with multiple divisions and partners• Rural• 97% White, Non-Hispanic

Models of Integration

The Atlanta Partnership	Educational Alliance	Garrett County
<ul style="list-style-type: none">• Joint enrollment process• Joint meetings between staff and parents	<ul style="list-style-type: none">• Focus on frontline staff to provide services to the family unit through service provision and referral to key partners	<ul style="list-style-type: none">• Increase in communication among staff and referrals made within and across divisions• Improved MIS which collects more family service and outcome data and supports integration

Site Performance Measures

- The Two-Generation Approach will enroll 125+ families.
- All parents will receive 3 coaching sessions with a Pathway Coach.
- All parents will participate in at least one “bundled” meeting with their Pathway Coach and Family Support Coordinator.
- 50% of families will have participated in at least one financial coaching session by the end of 2014.
- All children enrolled in Head Start will attend greater than 85% of the time.
- 25 parents will apply to college, and of those who apply 50% will enroll and participate in at least one semester.

Descriptive Outcome Study

Design Components

- Longitudinal descriptive study
- Approximately 646 Families
- Two Cohorts:
 - Cohort 1: 535 Families
 - Families in program with children in ECE in fall 2014
 - Followed through spring 2016
 - Cohort 2: 101 Families
 - New families entering two-generation programs in fall 2015
 - Followed through spring 2016

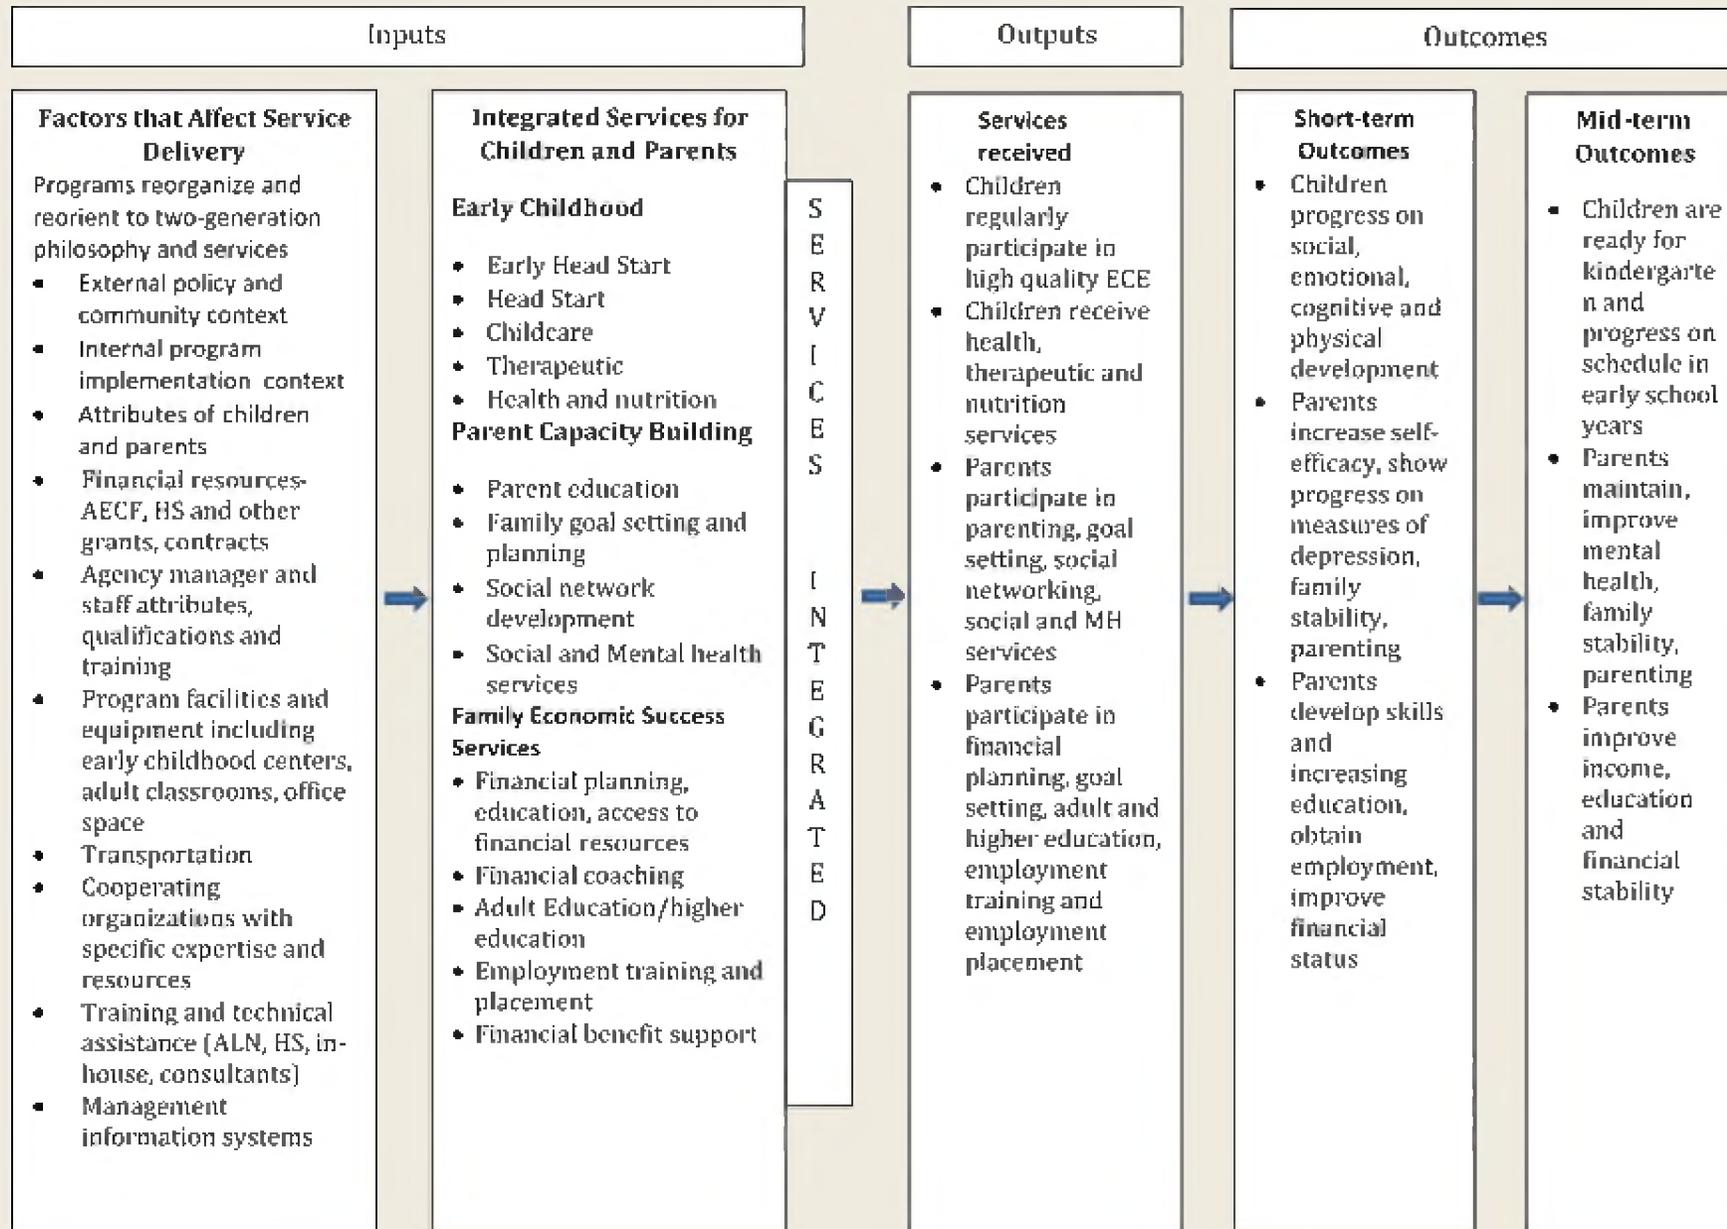

Data Sources

Standardized data from the grantees' management information systems are the main data source for the Study. These elements include the following:

- Child, parent, and family demographics; and other characteristics including measures of parent depression
- Services provided to children and parents including measures of early childhood program quality
- Child and adult assessments
- Incentives provided to participants
- Staff characteristics and qualifications
- Family goals and progress toward goals

Example Research Questions:

- What are the characteristics of the Two-Generation families and children in the programs?
- What are the FES and other services provided to parents and the participation levels of parents in the various services?
- What are the rates and characteristics of progress in or completion of economic improvement services, training, and education?
- Are there changes in parent employment over the course of the intervention?

Services Received

- Children regularly participate in high-quality ECE
- Children receive health, therapeutic, and nutrition services
- Parents participate in parenting, goal setting, social networking, social and MH services
- Parents participate in financial planning, adult and higher education, employment training, and employment placement

Short-term Outcomes

- Children progress on social, emotional, cognitive, and physical development
- Parents increase self-efficacy, show progress on measures of depression, family stability, parenting
- Parents develop skills and increasing education, obtain employment, improve financial status

Mid-term Outcomes

- Children are ready for kindergarten and progress on schedule in early school years
- Parents maintain, improve mental health, family stability, parenting
- Parents improve income, education, and financial stability

Examples of Indicators

Family and Child Characteristics	Integrated Services	Short- and Mid-Term Outcomes
<ul style="list-style-type: none"> • Parent's race, ethnicity, language, age, marital status • Family size • Income • Employment/unemployment • Educational attainment • Housing • Parent depression • Health insurance • Employment benefits • EITC • TANF, WIC, SNAP etc. • Child support 	<ul style="list-style-type: none"> • Adult education and economic services • Early Head Start • Head Start • Childcare • Financial planning • Employment training 	<ul style="list-style-type: none"> • Children's social and emotional development • Children's physical development • Children's educational performance • Parents' increased education • Parents' stable employment • Improved financial status • School readiness

Cost Study

Goals for Cost Study

- Explore predictors of cost based on client characteristics
- Explore the extent to which case-level costs mediate client outcomes
- Determine whether high-cost cases demonstrate better outcomes than low-cost cases

Key Takeaways

- It is critical that all staff, not just administrators, buy into the value of evaluation for determining what does and doesn't work.
- Measures/indicators of progress should be modest, proximal, and focus on mechanisms that will lead to more robust outcomes.
- Agencies are advised to do a thorough assessment of their data capacity systems to determine whether they are sufficient to use for evaluation purposes.

The Power of Stories in Research & Evaluation

OFFICE OF FAMILY ASSISTANCE
COMMUNITY OF LEARNING ON TWO-GENERATION STRATEGIES

PANEL PRESENTATION: SEPTEMBER 20, 2016

Kim Keating, M.Ed.

JAMES BELL ASSOCIATES, INC.

Introduction

- The Power of Stories
 - The appeal of stories and storytelling
 - The science behind stories
- Using Stories in Program Research
 - The value of stories in qualitative evaluation
 - “Data collection and reporting”
- Key Considerations
 - Honoring the storyteller
- Resources

The Power of Stories

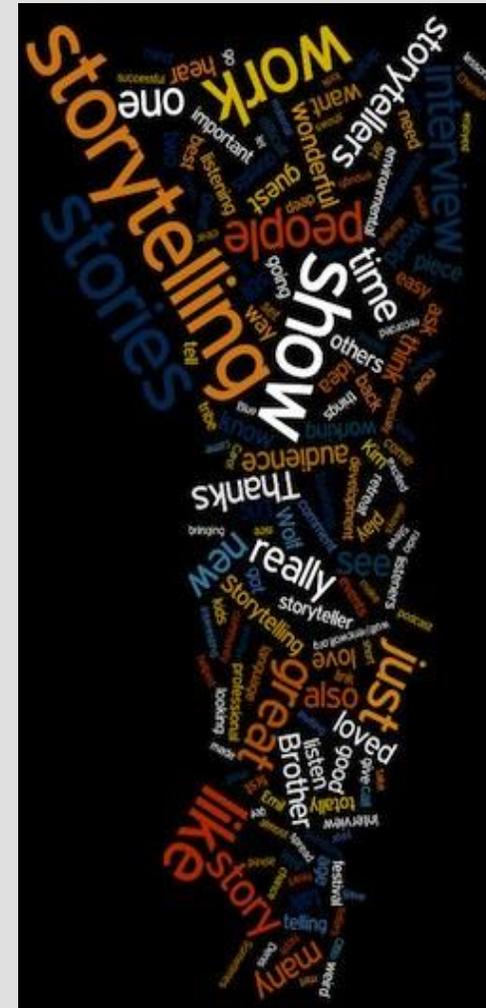

Storytelling is ...

- An ancient and valued practice that has served many purposes throughout time and across all cultures.
 - Entertainment
 - Education/transferring knowledge
 - Passing on of values
 - Preserving history
 - Political mobilization
- A powerful mode of human expression and a sophisticated form of “meaning-making.”

The Power of Stories

What makes stories so intriguing?

- Unique nature
 - Capture our attention
 - Expand our imagination
 - Create interest
 - Influence our emotions
- Told in many forms
 - Written
 - Visual
 - Auditory
 - and more...
- Appeal to a variety of audiences

The Science of Stories... *Brain Power*

Left brain
(Attention)

- Takes in the story
- Processes the words

Right brain
(Meaning)

- “Fills in the gaps”
- Works to find the meaning
- Stores in the memory

Using Stories in Program Research

*"Sometimes there is a need
for something more to make
people sit up and listen."*

--Jane Field

Value of Stories in Qualitative Research

Qualitative research is of equal value to quantitative.

- Human service programs can enrich process and outcome evaluations by including stories in their qualitative research framework.
- Common qualitative data collection methods (e.g., interviews, focus groups) provide opportunities for collecting stories of program staff, participants, and other stakeholders in sharing their story.

Value of Stories in Program Research

Insight

Put a “human face” on data

- Motivations
- Values
- Emotions
- Challenges
- Barriers

Description

Explain what occurred

- Actions taken
- Moderating factors
- Client response

Amplification

Corroborate what numbers indicate

- Make quantitative data easier to understand
- Enhance data credibility

Contribution to Program Evaluation

Stories you select can...

Provide insight into whether, how, and why a program works.

Process

- Program goals and objectives
- Implementation process and progress
- Program activities and services offered
- Enrollment and engagement
- Challenges and solutions

Outcome

- Broaden understanding of outcomes for children and parents served.
- Present child and parent experience from own perspective
- Describe impact of services received
- Identify factors influencing progress and achievement of outcomes
- Challenges and solutions

Data Collection & Reporting – Selection of Stories

- After determining your purpose and research questions, consider the kinds of questions stories can and can not address

<i>Stories can...</i>	<i>Stories cannot...</i>
<ol style="list-style-type: none">1. Answer research questions that ask how or why about an experience, event, or outcome2. Provide in-depth information and understanding of individuals' thoughts, behaviors, and experiences3. Provide data that are sometimes more compelling than quantitative data4. Describe patterns, themes, and rare occurrences	<ol style="list-style-type: none">1. Answer research questions that ask how much, how many, or how often about an experience, event, or outcome2. Provide information that is generalizable to other people or settings3. Make quantitative assessments or predictions about outcomes4. Assess measurable impact or change in outcomes

Data Collection & Reporting – Selection of Stories

- Stories don't have to be good to be told
- Stories that do not end in 'success'
 - Describe efforts/interventions attempted
 - Help to describe challenges
 - Identify barriers
 - May still reflect progress in intended directions

Data Collection & Reporting -- Storytelling Methods

VERBAL

- Individual Interviews
- Group Interviews
- Story Circles
- Focus Groups

WRITTEN

- Case Studies
- Vignettes
- Letters
- Testimonials

VISUAL

- Photographs, PhotoVoice
- Drawings
- Digital Storytelling
- Scrapbooking
- Story Quilting
- Performance

Honoring the Storyteller

■ Engagement of Storytellers

- Involve storytellers throughout the process.
- Explain research goals to the participant(s) -- what you want to learn, how their stories will be used, and what to expect if they choose to participate (e.g., time required, how to reach you with questions).
- Consider and discuss issues of safety, confidentiality, consent, and data ownership.
- Before sharing stories, confirm with storytellers that the final form reflects their experiences.
- Allow those who share their stories to be active in program activities that may improve services and outcomes.

Honoring the Storyteller

■ Confidentiality and Ethics

- Collection and use of stories require mutual trust and respect; this facilitated by an open, honest, and transparent approach from beginning to end.
- Different levels of confidentiality may be required depending on the individual, the context in which the story was shared and reported, and methods used (e.g., audio recording, video).
- Observance of confidentiality can range from reporting the story and revealing its source to not reporting the story, concept, or source at all.

Additional Consideration

Not all stories are appropriate to share.

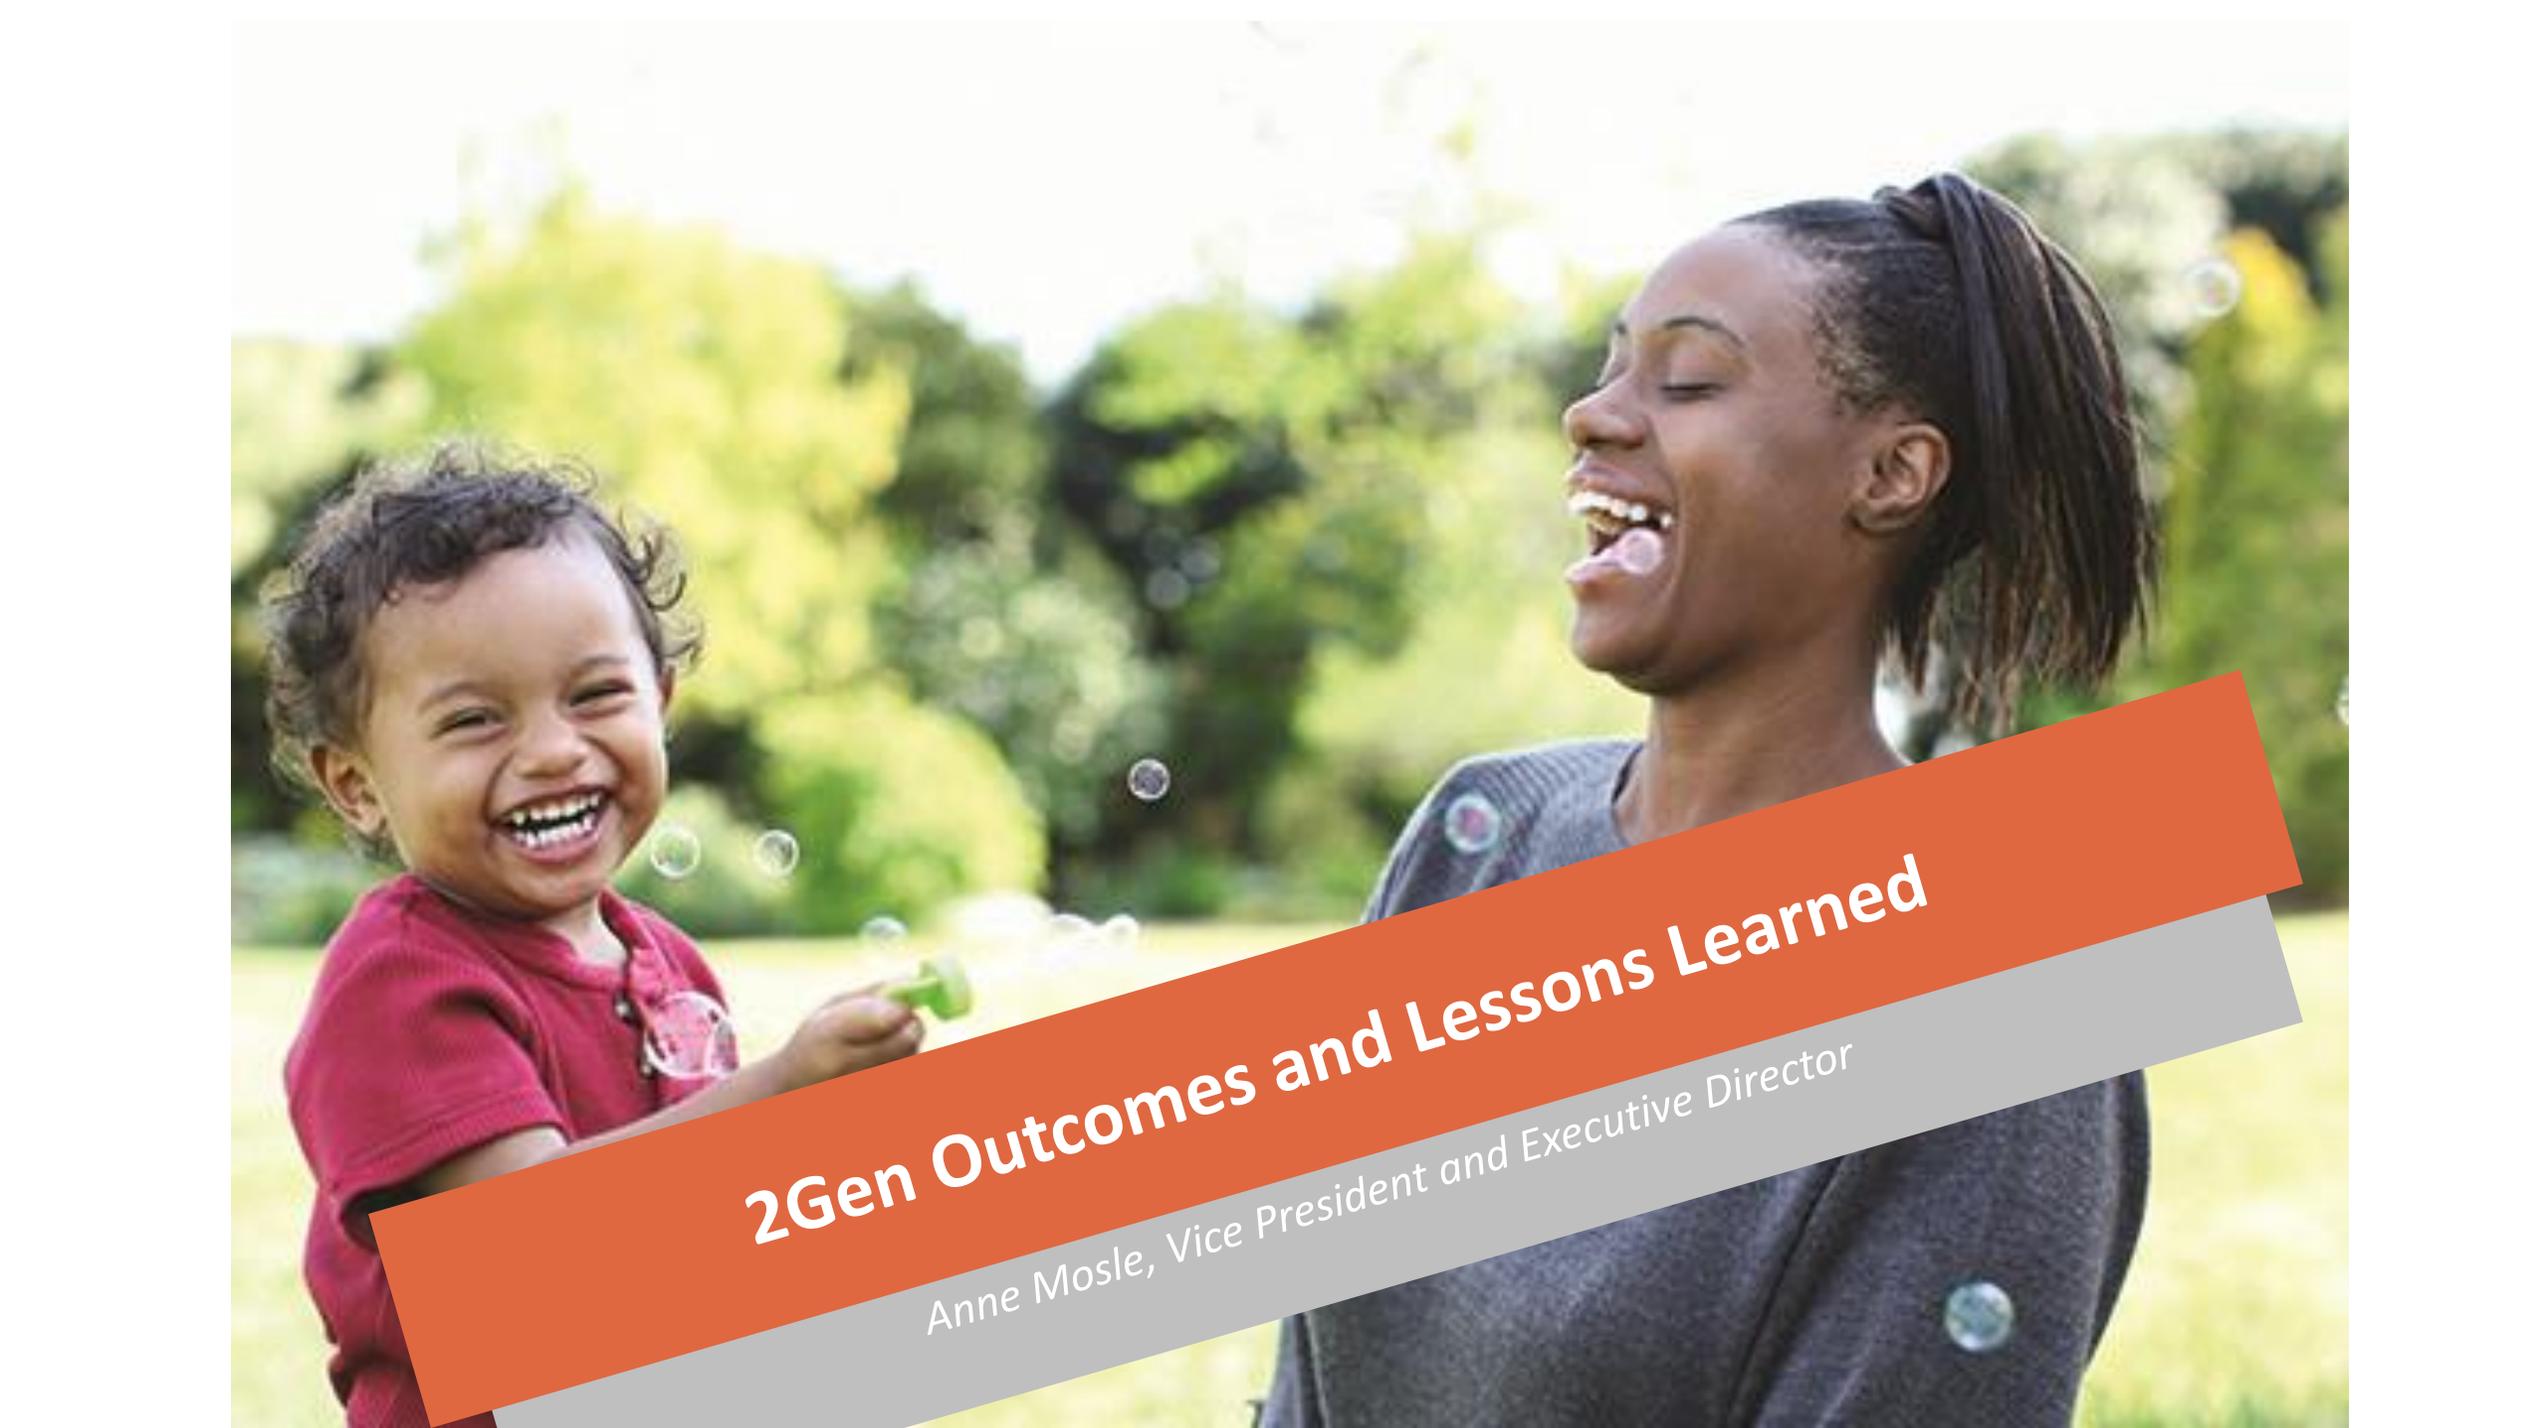

- Some may include sensitive information or identify other individuals who did not consent.
- Storytellers might not fully understand the need for confidentiality until after they have shared their story.
- Even when a consent form has been signed, important to ensure ongoing approval.

Resources

James Bell Associates
3033 Wilson Blvd., Suite 650
Arlington, VA 22201

Kim Keating: (703) 528-3230, keating@jbassoc.com

A photograph of a woman and a young child laughing joyfully in a park. The woman, on the right, has her eyes closed and mouth open in a wide smile. The child, on the left, is also laughing and holding a small green object. Bubbles are floating in the air around them. The background is a lush green park with trees.

2Gen Outcomes and Lessons Learned

Anne Mosle, Vice President and Executive Director

Ascend & the Aspen Institute

Aspen Mission: The Aspen Institute is an educational and policy studies organization based in Washington, DC. Its mission is to **foster leadership based on enduring values** and to provide a nonpartisan venue for dealing with critical issues.

Ascend Mission: Ascend at the Aspen Institute is the **national hub** for breakthrough ideas and collaborations that move **children & their parents** toward **educational success & economic security**.

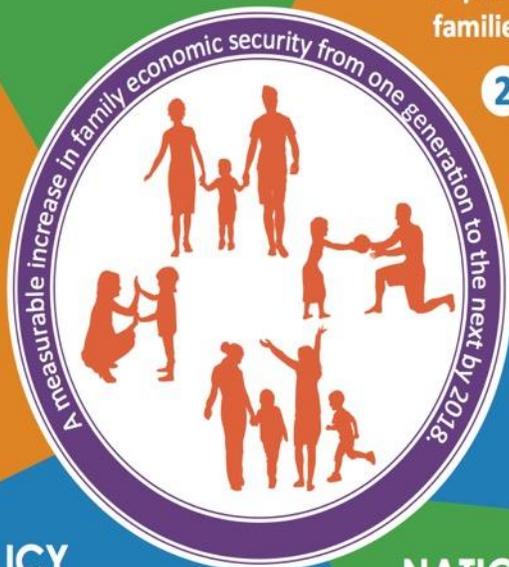

POWER OF THE ASPEN INSTITUTE ASCEND NETWORK

MULTI-SECTOR SOLUTIONS

#2GEN PIONEERS

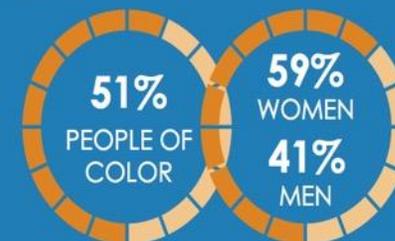

58 Network Partners &
41 Ascend Fellows

IMPACT ON FAMILIES

- 1 Steward \$6.2 billion in public services for families in 5 states
- 2 Serve 475,000 students in community colleges & 4-year institutions
- 3 Serve 1.3 million people through direct services
- 4 Research brain science, early childhood, health, workforce, social capital & executive function

ASCEND FELLOWS

POLICY LANDSCAPE

7 states working on/passed* 2Gen legislation:
[CO*, CT*, MA, TN, TX, UT, WA]

National 2Gen Policy:

- Rural IMPACT (August 2015)
- Two-Generation Economic Empowerment Act (anticipated in fall 2015)

NATIONAL REACH

30 states & the District of Columbia

Harness the Family's Full Potential

The Need

Fragmented policies and programs that address the needs of children and parents separately leave either the child or parent behind and dim each family's chance at success.

The Solution

Policies and programs that address the needs of *children and their parents together* can harness the family's full potential and put the *entire family* on a path to permanent economic security.

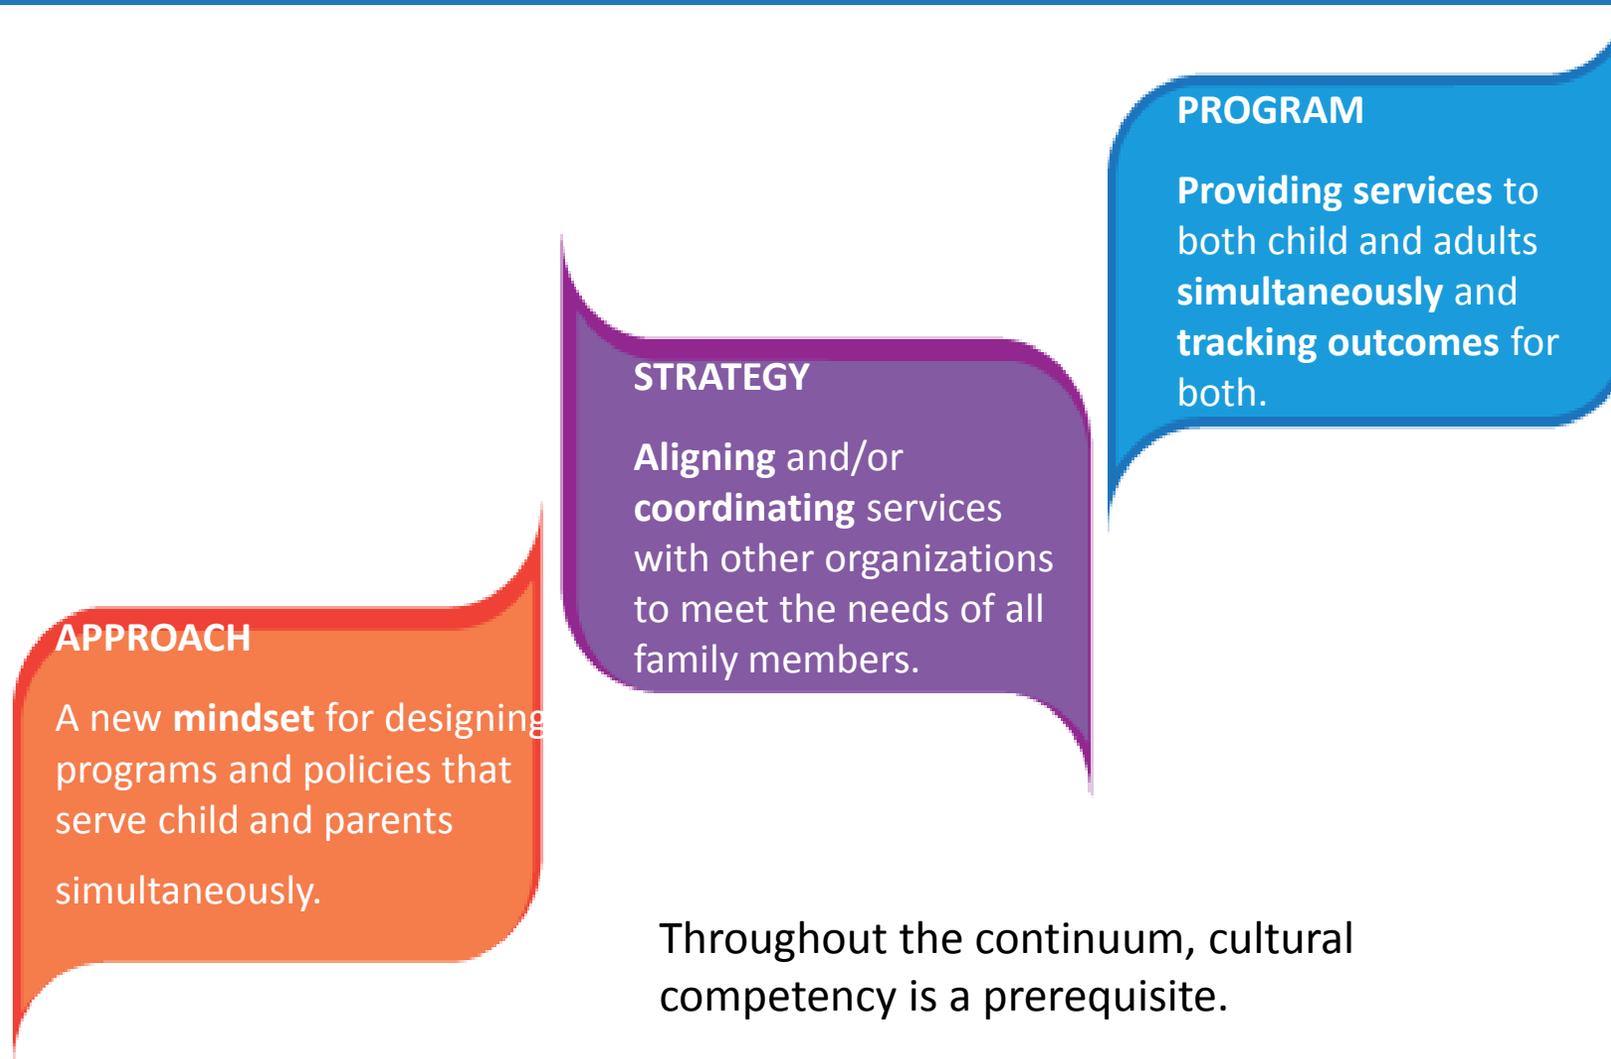

2Gen Theory of Change

TWO-GENERATION THEORY OF CHANGE

for an increase in family economic security, educational success, and health and well-being from one generation to the next by 2018.

2Gen Outcomes Program Continuum

Principles of 2Gen Program Evaluation

- Identify and measure child and parent outcomes
- Be flexible with methods – no one-size-fits-all
- Embed learning in design and strategy
- Know how collected data will be used
- Ensure internal capacity for most value from evaluation agenda

Conditions

How to Create Pathways to Outcomes for Two-Generation Programs:

1. Identify outcomes for your target population
2. Articulate the conceptual framework - including intensity, sequence and timing
3. Test and modify based on the theory of change

Example of Outcomes and Indicators

EDUCATIONAL SUCCESS

Parent

- Improved parenting skills
- Higher expectations for parent's and child's educational attainment
- Increased involvement in children's learning activities
- Improved functional literacy
- Parents are empowered as their children's first/primary teachers
- Receipt of certification and/or degree
- Increased motivation to pursue postsecondary education
- Increased enrollment in postsecondary education
- Increased GED attainment

Child

- Improved grades and achievement
- Improved post-secondary outcomes
- Improved literacy skills
- Meets developmental milestones
- Improved classroom behavior
- Higher attendance
- Reduction in grade repetition

Family

- Increased family engagement
- Enhanced home learning environment
- Increased family literacy

Assessment and Evaluation Tools

- Sample 2Gen logic model
- Sample 2Gen Theory of Change

Outcomes Bank for 2Gen Programs

Welcome to the 2Gen Outcomes Bank

Submit Materials to Outcomes Bank

This is a crowdsourced website. Please use the link below to submit additional outcomes, indicators, tools, and highlights of programs that articulate and track outcomes for children and the adults in their lives together. We welcome contributions from practitioners, policymakers, and researchers in all sectors.

SUBMIT ↗

Explore the 2Gen Outcomes Bank

The 2Gen Outcomes Bank is designed to help capture and organize the outcomes, research, tools, and evidence base for two-generation approaches, strategies, and programs. Within the database, you will find outcomes, indicators, and research organized by child, parent, and family across the core 2Gen components of education, economic assets, health and well-being, and social capital. This is a growing resource - materials are crowdsourced from those active in two-generation and related fields.

VIEW ↗

Lessons Learned

- Leadership is key to culture change;
- **New paradigm for fathers and non-custodial parents;**
- Human services innovation, courage and collaboration (inter, intra and with community);
- **Early childhood is a key lever;**
- Mental health screening and trauma informed care;
- **Social capital: models and measurement;**
- Brain science: implications for children and parents;
- **Technology: breakthroughs and challenges;**
- New partners and allies in building adult capacity (community colleges and workforce partners);
- **Importance of starting with principles.**
